Projects

2023/07 – Present   **RCC Sentinel**

RCC Sentinel is a specialized cloud-hosted system focusing on robust risk management and compliance for contracting enterprises. It offers comprehensive tools for tracking, analyzing, and mitigating risks across various commercial processes.

Contributions:
- Designed and implemented automated compliance alerts to minimize operational risks.
- Optimized data integration pipelines for real-time performance tracking.
- Enhanced user experience by improving the interface for risk and compliance reporting.

2022/04 – 2023/07	**Econsys V5**
	Econsys V5 is a cloud-based SaaS platform tailored for specialist contracting businesses. It provides end-to-end commercial management with in-built automated risk management, compliance, and governance tools. The platform is designed to streamline processes such as sales forecasting, project delivery, and contract management through real-time dashboards and user-configurable workflows.

Contributions:

- Developed core functionalities such as task automation and real-time project insights.
- Integrated advanced reporting modules to enhance decision-making.
- Collaborated with cross-functional teams to ensure seamless cloud deployments and feature rollouts.

Academic Qualifications
